SAP UI5, Fiori Elements, Smart Controls | SAP CAPM, OData V2/V4, CDS | SAP BTP (Cloud Foundry, Work Zone, Destinations) | JavaScript, HTML5, CSS3, XML, JSON | Performance Optimization, Async Programming | Git, CI/CD, BAS

PROFESSIONAL EXPERIENCE

Senior Analyst – Accenture | Dec 2023 – Present

Project: **TotalEnergies (France)** – SEQUANA

- Developed and maintained SAP UI5 custom & Standalone apps and Fiori Elements applications using CAPM and OData services, migrated 30+ apps from Neo to Cloud Foundry
- Deployed applications on SAP BTP, SAP Work Zone, and SAP Build Code with role-based authorizations.
- Integrated secure backend services and optimized performance using efficient data binding.

System Engineer – TCS | Mar 2022 – Dec 2023

Project: **H&M (Sweden)**

- Built SAP Fiori Elements applications including List Report, Object Page, and Overview Page.
- Supported Fiori upgrades, regression and unit testing, and SAP standard app extensions.
- Improved UI responsiveness through performance tuning and model optimization.

Associate Software Developer – Teleperformance | Nov 2020 – Feb 2022

Project: **Marks & Spencer (UK)**

- Developed custom SAP UI5 applications using XML views, fragments, and smart controls.
- Implemented responsive UI components such as tables, dialogs, filters, and charts.
- Integrated frontend applications with OData and CAP-based services.
